-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on 10/26/07 is acknowledged. The traversal is on the ground(s) that the examiner has not considered the content of the claims in view of the disclosure in the specification. This is not found persuasive because applicant has not provided any evidence to support this allegation.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

2. Claims 8-10 are objected to because of the following informalities: the claims contain drawings. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Rasmussen et al 5,776,580. The reference discloses a sandwich structure in Figure 4D comprising a core 18 with two facing layers 19, 20 wherein the mineral fibers in the core are crimped, i.e. folded, so as to have a V-shaped profile and wherein the tips of the V's are aligned. The facing layers may be metal (see column 2, lines 64-66) and the core may be formed from a plurality of juxtaposed pieces that extend along the length of the facings.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5-7 and 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rasmussen et al 5,776,580. The reference discloses the invention substantially as claimed; see the above rejection. However, it does not disclose the claimed properties of the sandwich. It has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. Therefore, it would have been obvious to one of ordinary skill in the art to adjust the density of the fibers in the product of the reference in order to provide particular compressive and sheer strengths for a particular end use.

7. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rasmussen et al 5,776,580 in view of applicant's acknowledged state of the art. The reference discloses the invention substantially as claimed; see the above rejection under 35 USC 102. However, it does not disclose the claimed composition of the glass used to make the fibers. Applicant discloses that these particular compositions were well-known in the art at the time of the invention; see page 7, lines 3-10. It would have been obvious to one of ordinary skill in the art to use any specific glass composition to form the glass fibers of the product in the reference to provide desired properties for a

particular end use in the absence of unexpected results attributable to the fiber composition.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
